

WTO Disciplines and Biofuels

Given the increased demand for renewable energy and the recent surge in biofuels production, it is timely to examine how international trade rules apply to the sector. Important questions that need to be addressed include: How should biofuels and their feedstocks be classified—are they agricultural, industrial or environmental goods? Which WTO rules apply to government mandates and support policies to promote the production of biofuels? Do biofuel sustainability standards present technical barriers to trade?

Please join us for the launch of the International Food & Agricultural Trade Policy Council's paper examining WTO options for biofuels by Professor **Robert Howse** of the University of Michigan, principal trade expert for the Renewable Energy and International Law Project. The launch will begin with opening remarks, followed by Professor Howse's discussion of the paper's main findings, and will conclude with discussants' perspectives. The paper will be available for download at IPC's website, www.agritrade.org.

Opening Remarks:

Robert Simon

Minority Staff Director

Senate Energy and Natural Resources Committee

With Discussants:

Weber Amaral

CEO, Brazilian Biofuels Institute, and
Professor, University of Sao Paulo

Carl Hausmann

CEO of Bunge North America, and
IPC Member

Angelos Pangratis

Deputy Head of Delegation, European Commission

Emily Beizer

Mayer, Brown, Rowe & Maw, LLP

Eric Sievers

Senior Associate, Baker & McKenzie, Biofuels Group, and
Renewable Energy and International Law Project (REIL)

at:

Longworth House Office Building, Room 1302

Washington, DC 20515

October 27, 2006

9 am – 12 noon

Seating for this event is limited, please RSVP to Amy Testa at testa@agritrade.org

The paper was made possible by generous support from the UN Foundation and the German Marshall Fund
